

Filière : II-BDCC 2

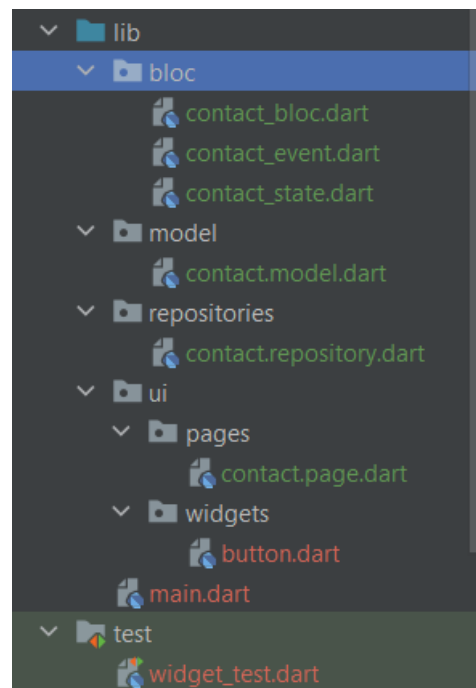

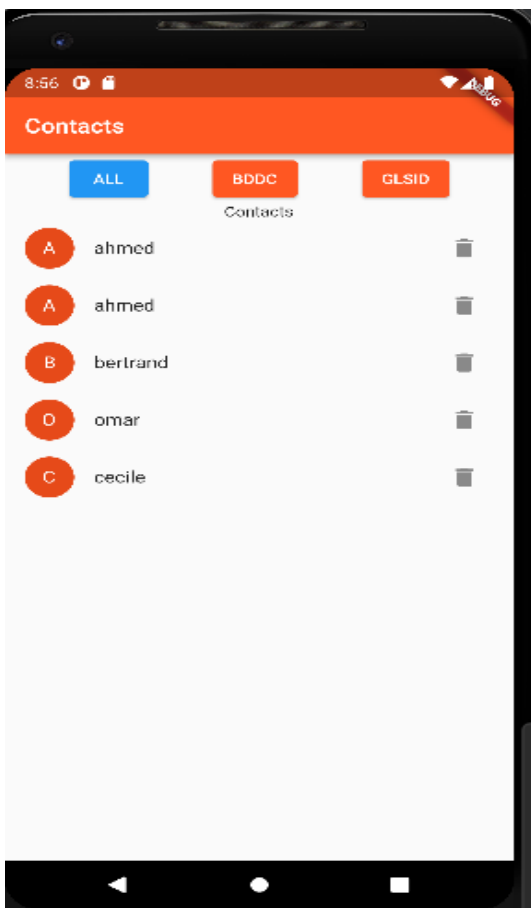

Nom : KAFANDO Tounwendsida Bertrand

TP Flutter

Code :

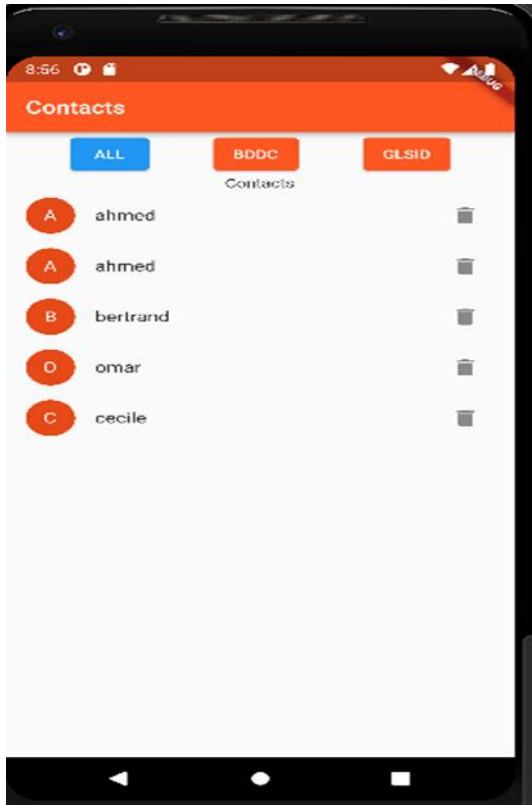

Objectifs :

Application de gestion de contact en utilisant le plugin bloc pour le state management.

I- Bouton All

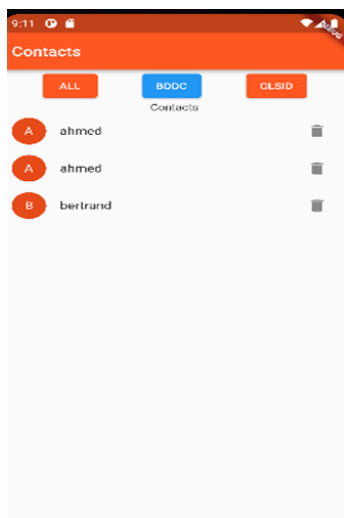

Il affiche tous les contacts :

```
List<Contact> contacts = [  
    Contact(id: 1, name: "ahmed", group: "BDDC", profile: "AH"),  
    Contact(id: 2, name: "ahmed", group: "BDDC", profile: "AH"),  
    Contact(id: 3, name: "bertrand", group: "GLSID", profile: "BE"),  
    Contact(id: 4, name: "bertrand", group: "BDDC", profile: "BE"),  
    Contact(id: 5, name: "omar", group: "GLSID", profile: "OM"),  
    Contact(id: 6, name: "cecile", group: "GLSID", profile: "CE")  
];
```

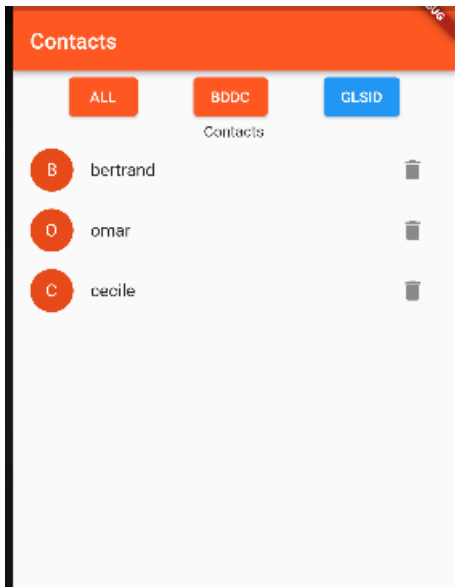

II- Bouton BDDC

Il affiche uniquement les éléments de bdcc

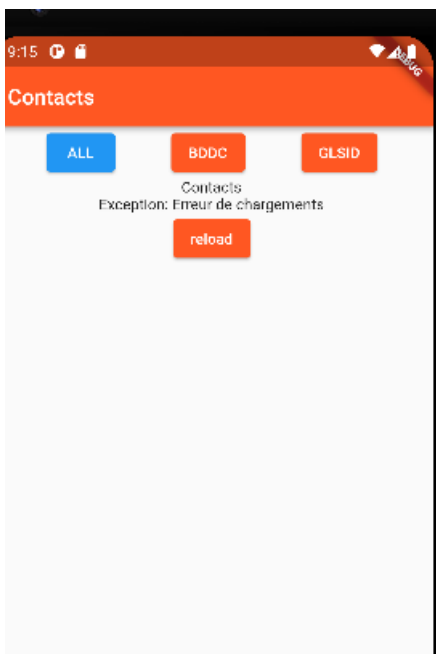

III- GLSID

À la clique on affiche les gens de Glsid

IV- Traitement erreur

Si jamais une erreur se produit la dernière requête est enregistrée et un bouton propose de relancer la requête.
